Help "Restore a smile, restore a life";
Donate Your Laboratory Materials to Give Back a Smile

The American Academy of Cosmetic Dentistry Charitable Foundation (AACDCF) and Give Back a Smile (GBAS) program, need your help. We are seeking donated laboratory materials for our participating dental labs to use in their GBAS cases. Volunteer dental laboratories play a significant role in the GBAS program; however they are sometimes limited by the unbudgeted costs of products/materials needed to complete the case. Support these volunteer laboratories by donating materials that could help "Restore a smile, restore a life".

If you would like to become a "Foundation Supporter" and donate laboratory materials, please review the enclosed program guidelines and submit following information in an emailed reply.

- **Company, Address & Web site**
- **Donation Contact Name, Phone & Email**
- **Types of products offered for donation**

The Give Back A Smile program provides cosmetic assistance to survivors of intimate partner violence who have suffered damage to, or lost, their smile during an abusive attack. So far, over 850 survivors have had dental work completed for a total dollar value of over $8 million in donated dental services. There are currently over 400 smile restorations in progress throughout the United States and Canada. ***Your support of this program is greatly appreciated.***

Donating Laboratory Materials Information

Program Guidelines for Donating Laboratory Materials

- The AACD or participating dental laboratory will contact the donating laboratory materials company with their case materials request. The participating dental laboratory must provide the case authorization number (for example JONJ113) to donating company, in order maintain case confidentiality. Donated lab materials may only be used on GBAS cases.
- Dental laboratories will be provided a listing of donating company contacts and will be directed to the GBAS web site where materials donating company contact information will also be listed. The dental laboratory and donating company will work together directly on specific materials needs, shipping, timeline and other logistical items.
- The materials donating company will be listed as a “Lab Materials Supporter” with a hyperlink to the company web site on the “Foundation Supporters” page of the GBAS web site. Donating company recognition also includes listing as “Foundation Supporter” in bi-annual AACD Charitable Foundation newsletter, the AACDCF Annual Report, and annual Scientific Session signage.
- The AACD reserves the right to review and approve any marketing and/or advertising by the materials donating company which features GBAS and/or a specific case.

AACDCF Mission:

The American Academy of Cosmetic Dentistry Charitable Foundation's (AACDCF) mission is to assist in rebuilding the lives and dignity of survivors of domestic violence through compassionate cosmetic dental services and support programs. Our program provides restorative and cosmetic dentistry in the smile zone at no cost to qualified survivors through our nationwide network of volunteer cosmetic dentists and our support team of laboratories and dental manufacturers.
